* CCP is charged based on the number of physical CPU sockets in the Private Clouds (Grids) controlled by the CCP Application. E.g.: 2 Grids managed by the CCP, each with 10 physical CPUs, requires 20 CCP Licenses.

All licensing models include basic support and periodic updates.

For installation and configuration of the CCP App we recommend a minimum intermediate-level experience with operating AppLogic grids. DNS Europe provides included remote support for initial starting installation & configuration of the CCP and included sample templates.
